

AFFIDAVIT OF SPECIFIC DISCIPLINE

For engineering applicants who are applying for either licensure or a temporary permit, verification of good standing must be provided by the state of current licensure, including the discipline of examination. Should the state not license by discipline, verification of discipline may be provided by NCEES record or by submitting this form from either one licensed professional engineer from Nebraska, or two licensed professional engineers outside of Nebraska.

Please note engineers applying for a Structural Engineering license cannot use this form. To be eligible to be licensed as a Structural Engineer in Nebraska, you must have either passed sixteen hours of the NCEES structural engineering exams, or be licensed as a Structural Engineer in another state with 15 years or more of licensed structural engineering work experience.

I, _____, a Professional Engineer, licensed in _____
